

## ASLAN C 60 / 61

### The self-adhesive blackboard film

Writings with chalk are possible by reason of its special embossed and hardened surface.

For advertising signboards and as a substitute for the blackboard.

## Technical data

### Construction

face-film:	special PVC, green or black	
thickness:	~ 160 µm	
adhesive:	acrylic pressure adhesive solvent free	square quantity: ~ 25 g/m <sup>2</sup>
release liner:	poly coated paper	square weight: ~ 65 g/m <sup>2</sup>

### Characteristics

adhesive strength (ASTMD-903)	immediately: 1 week adhered:	min. 2,8 N/cm min. 5,0 N/cm
dimensional stability:	applied onto acrylic sheets after 2 h stored at 70 °C	insignificant longitudinal shrinkage

### Processing

application:	only dry. Humidity, film applied for longer period and high temperatures will increase adhesive strength.  To be applied substrate must be free of dust and grease and may not vapour any solvents.
storage properties:	Adhesive power, not less than three years from date of production. The films must be stored at room temperature and be protected from direct sunlight, excessive heat, high atmospheric humidity and dampness. To avoid pressure points appearing on the roll surface, we recommend the rolls be stored either on end or on purpose design `hanging` racks.

All technical data and advice is based on our experience and measured testing that we believe to be reliable. It remains the customer's responsibility to test our products suitability for the purpose intended.  
 The quality of our products is regularly examined, upgraded and developed. ASLAN, Schwarz GmbH & Co. KG reserve the right, without prior notice, to adjust, upgrade and improve the chemical structures or physical characteristics of their products in accordance with their latest knowledge.
